GILT EDGE

PP#20,177. Vibrant green foliage edged in gold creates a striking display. Silvery new growth adds another season to 'Olive Martini'. Fragrant clusters of creamy white, bell-shaped flowers crowd the branches from mid to late fall. Excellent as a hedge, backdrop, or specimen. Zone 6. 10'+H x 10'+W.

The sharply contrasting leaves of 'Gilt Edge' have dark green centers and brilliant gold margins. New leaves are coated with silvery scales, which thin to dots on the upper surfaces of mature foliage. In the fall, small, fragrant, silvery flowers hide among the branches. Pollinator friendly. Zone 6. 8'H x 8'W.
