

OPHIPOGON NIGRESCENS

Stunning Color and Texture
for the Shade Garden

BLACK MONDO GRASS

Commonly known as Black Mondo Grass or Black Lilyturf, 'Nigrescens' provides stunning color and texture for the shade garden. Its dense, arching, purplish-black, grass-like foliage thrives in shade to partial shade, and is non-invasive, making it an excellent choice for planting en mass in shady borders, and in mixed container plantings. Dark lavender flowers give way to glossy, purple berries in the Fall, adding to its versatility.

BOTANICAL NAME -- *Ophiopogon planiscapus* 'Nigrescens'

COMMON NAME -- Black Mondo Grass, Black Lilyturf

USDA HARDINESS -- 5 to 10
